

PCTW

Pure Clean Train Wash Aluminum/Steel Brightener & Acid Cleaner

- PCTW** is a single component acid cleaner formulated to optimize the maintenance cleaning of subway cars and other equipment where an acid is required for brightening aluminum and steel surfaces.
- PCTW** is safe to use on Lexan, MR-10 Lexan Coating, stainless steel, aluminum, rubber, and other materials composing subway and train cars.
- PCTW** will remove heavy soils and iron oxide from aluminum or stainless steel exterior railcar surfaces either by hand cleaning procedures or as applied through spray racks in a mechanically operated train wash system.
- PCTW** The effluent after-use is acceptable for sanitary sewer disposal (with pH adjuster if required depending on local regulations). **PCTW** does not contain any heavy metals, phosphates, chlorinated solvents, mono-ethers, acetates, petroleum hydrocarbons, or other compounds in excess of safe industry standards.

PCTW Advantages

- Saves money - water dilutable
- Surfactants greater than 90% biodegradable
- Safe to use on most surfaces
- Non-flammable
- Rinses freely without residue

Manufacturer's Part Numbers:

- Pail Part Number: INCGCCLXPCTW1PL
- Drum Part Number: INCGCCLXPCTW1DR
